- W. Claim 43, line 1, replace "39" with --33--.
- X. Claim 39 is amended to read as follows:

39. (Currently Amended) A computer-readable medium for use in a network that includes one or more network devices that have Web browsers implemented thereon, the network devices being network connectable to a network server, the network also including a data server that is in communication with the network server, wherein the network server sends displayable content to the network devices, and wherein the one or more network devices may request data that is stored in the data server even though the data server itself is not configured to present the data as displayable content, the

Art Unit: 2154

computer-readable medium storing data for access by a program module being executed on the network server, the computer-readable medium comprising:

a data structure stored on the computer-readable medium, the data structure including compiled template data representing a template for displayable content, the template being identified based on bandwidth available to send the displayable content to a network device, the compiled template data to be used by the program module, data structure comprising:

a data dictionary data object that identifies non-displayable data to be accessed from the data server that stores the non-displayable data in any of a plurality of non-displayable formats, wherein the non-displayable data is not natively compatible for viewing with a particular Web browser;

a template constant data object that identifies one or more constants associated with the template that are generic across a plurality of languages;

a functions data object that identifies one or more functions associated with the template for converting the non-displayable data that is stored in any of the plurality of non-displayable formats at the data server and is not natively compatible for viewing with a particular Web browser into a format that is natively compatible for viewing with the particular Web browser;

a token information table data object that identifies locations in the template associated with the data dictionary data object, the template constant data object, and the functions data object; and

an HTML data object that identifies content associated with the template

that is natively compatible for viewing with the particular Web browser.

REASONS FOR ALLOWANCE

4. The following is an examiner's statement of reasons for allowance:

None of the prior arts of record teach or suggest the claimed limitation with respect to an act of identifying a template for the requested content based on bandwidth available to send the displayable content to the network device, and then also associating the same template including displayable content that is natively compatible for viewing with the Web browser, one or more generic representations of template constants that are generic across a plurality of languages one or more tokens representing non-displayable data that is stored on the data server and is not natively compatible for viewing with the Web browser, one or more functions for converting the non-displayable data into a format that is natively compatible for viewing with the Web browser. and one or more functions for providing the template constant in an appropriate language for the user of the Web browser. None of the prior arts of record teach or suggest the claimed limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
